

Company profile

MINSENS TECHNOLOGY CO., LIMITED is a high-tech LED light company which combines R&D, production, technical support with sales together. Our goals are to provide our customers with professional service, high quality goods, most competitive price and fast respond. MS is willing to be the biggest industrial led lighting solution provider in the world.

Our products mainly include industrial led light, such as LED flood lights, LED street lights, LED bay lights, and commercial LED light, such as LED panel lights, LED downlights, LED bulb lights, LED tube lights etc. They have been successfully exported to more than 80 countries over the past years. Our main customers are from Europe, specially in Germany. All of our LED lights are certificated by CE & RoHS, Some of led lights we get UL cUL ETL DLC SAA CB certificates.

As a professional manufacturer, we have strong production ability to provide OEM & ODM service as per customers' requirements. We will insist on providing products with high performance-price ratio for all customers. We welcome you to contact us for more product details at any time.

We have three factories in Wuhan, Shenzhen and Zhongshan. Our sales headquarters is in Wuhan city, Because there are more than 82 universities here. We welcome you to contact us for more product details at any time.

Strong Professional R&D Team to ensure that each product is outstanding

Our team

MS is full of smart, driven people who care a lot more about getting it done, and the relationships we build, than about proving how clever we are. MS's people truly become a valuable extension of our clients' teams. As a result, our people are a primary reason our clients would recommend MS to others.

Our "one team" attitude breaks down silos and helps us engage equally effectively from the products to the front line. Our collaborative working style emphasizes teamwork, trust, and tolerance for diverging opinions. People tell us we are down-to-earth, approachable and fun.

We have a passion for our clients' true results and a pragmatic drive for action that starts Monday morning 8am and doesn't let up. We rally clients with our infectious energy, to make change stick.

And we never go it alone. We support and are supported to develop our own personal results stories. We balance challenging and co-creating with our clients, building the internal capabilities required for them to create repeatable results.

We work hard, but we don't take ourselves too seriously. We enjoy what we do and we laugh a lot...most often at ourselves.

It feels different to work with us.
